Summary

Front-End Developer skilled in React, crafting responsive web applications and addressing real-world challenges, while exploring backend development and AI technologies.

Projects

Resumind - AI Resume Analyzer |

- Developed **Resumind**, an AI-powered resume analyzer aimed at improving the accuracy and efficiency of resume evaluation processes.
- Implemented a robust frontend using **React (Vite)**, **TypeScript**, and **React Router v7**, ensuring modular architecture and smooth navigation.
- Integrated **Puter.js** for authentication, AI-driven analysis, and secure cloud storage, strengthening backend functionality and overall system reliability.

Blog Application |

- Built **ThoughtHaven**, a full-stack blogging platform using React 19, Redux Toolkit, and Tailwind CSS.
- Integrated **Appwrite (BaaS)** for user authentication, database operations, and media storage with secure JWT-based workflows.
- Implemented full post management with TinyMCE editor, enabling rich-text creation, editing, and author-specific access control.

AI & Voice-Enabled Web Applications

- ASKIO – Developed an AI-powered chatbot leveraging React and Google Gemini API, offering chat, content generation, code assistance, and translation. Designed a sleek, responsive UI using Tailwind CSS and React Router.
- Echosait – Built a text-to-speech application using React, Tailwind CSS, and Web Speech Synthesis API, enabling real-time voice output with a responsive, user-friendly interface.

Note Nostre- full stack notes app |

- **Developed a Full Stack Notes Application** using **React**, **TailwindCSS**, and **Firebase** with **real-time synchronization** and **secure user authentication**.
- Integrated **TinyMCE Rich-Text Editor** to enable **formatted note creation** and **automated categorization** by **year and month**.
- Enhanced proficiency in **frontend–backend integration** and **responsive interface design**.

Browser-Based Mini Games

Built a set of interactive games to deepen JavaScript and React fundamentals through practical logic-based applications.

- Developed classic games like Rock-Paper-Scissors, Snake Game, and Hangman using **JavaScript**, focusing on DOM manipulation, event handling, and real-time feedback.
- Created a Dice Roller Game using **React**, leveraging **conditional rendering** and component-based UI design to display dynamic outcomes and animations.
- Emphasized clean UI/UX, responsive design, and deployed all games for browser play and learning showcase.

Education

Maharaja Surajmal Institute - GGSIP University — **AUGUST 2024 - PRESENT**
Bachelor of Computer Applications (BCA) — Graduation

- Gaining a strong foundation in **computer science, programming, and web development**.
- Learning **data structures, algorithms, and software development** with hands-on projects.
- Actively participating in **coding competitions.**

Kendriya Vidyalaya No. 1, Delhi Cantt — **AUGUST 2022 - MARCH 2024**
Science with Computer Science — Higher Secondary

- Studied **Physics, Chemistry, Mathematics, and Computer Science** with a focus on programming.
- Gained foundational knowledge of **Python and Database (SQL)**.
- Developed **time management skills** and the ability to **handle pressure effectively** through academic challenges and project deadlines.

Skills

Programming & Development
C, Java, JavaScript, HTML, CSS, Python

Frontend Technologies
React.js, Bootstrap, Responsive Design, Tailwind CSS

Data Structures & Algorithms
Arrays, Linked List, Stack, Recursion, Tree

Database
MySQL

Tools & Platforms
Git, GitHub, Appwrite, Netlify, Local Storage, Fetch API

Soft Skills
Time Management, Problem-Solving, Pressure Handling, Teamwork

Certifications

Introduction to Generative AI Studio — **July 2025**
Simplilearn
View Certificate

Languages

English | **Hindi**
